

Full-Stack Developer with 5+ years of experience and an emphasis on Backend Systems

EXPERIENCE

- Working as a volunteer at [ethics.vc](#), a non-profit start-up, dedicated to exploring and promoting best practices in ethical venture capital
- Designing and developing application from concept to deployment, including UI/UX design (Figma), database architecture (PostgreSQL), and front-end/back-end development (Python and Django).

- Advanced from intermediate to Senior Software Developer, demonstrating growth and leadership
- Created solutions in a fast-paced start-up environment, growing to a mid-sized company
- Focused extensively on API development as part of a high-performance agile team, significantly boosting customer adoption and reducing churn through the implementation and maintenance of third-party API integrations for roadmapping software
- Worked on an AI chatbot using Python and integrated APIs for seamless information retrieval across Tempo products, reducing developer reliance by enabling autonomous access for sales and support teams
- Implemented the Feedback and Idea Management solution, enabling users to filter feedback, prioritize features, and effectively promote ideas on roadmaps
- Initiated and led a group supporting women in tech, promoting collaboration and engaging in mentorship of junior developers
- Often took opportunities to collaborate with sales to demo features
- Modernized legacy code to enhance accessibility, user experience, and performance
- Developed full-stack solutions using a wide range of technologies, including JavaScript, TypeScript, Node.js, ReactJS, Apollo + GraphQL, PostgreSQL, and MongoDB, across various projects
- Implemented unit tests with Sinon.js, Mocha, and Chai
- Leveraged git, GitLab, & AWS for version control for CI/CD
- Tracked usage metrics and assess performance improvements by setting up DataDog Dashboards

- Developed and demoed secure backend features using Alexa Skill Kit and Dialogflow with GCP to share up-to-date data on investments and coverage with users of the Sun Life Voice Skill, ensuring data integrity and user privacy
- Mentored new co-op cohort each quarter
- Nominated for 2019 CEO's Award of Excellence

- Pursuing OMSCS program part-time

- PMC volunteer note taker for students with unique needs
- Received outstanding TA nomination

JavaScript React Node.js Python

Django PostgreSQL MongoDB

REST APIs Agile Development

- Applied ML techniques using Python and scikit-learn/TensorFlow; built regression, classification, and clustering models
