EXPERIENCE

Fullstack Software Developer

The Institute for Ethical Venture Capital

📅 Present 📍 Remote

- Working as a volunteer at ethics.vc, a non-profit start-up, dedicated to exploring and promoting best practices in ethical venture capital
- Designing and developing application from concept to deployment, including UI/UX design (Figma), database architecture (PostgreSQL), and front-end/back-end development (Python and Django).

Fullstack Software Developer

Tempo.io (Through acquisition of Roadmunk)

📅 April 2020 - June 2024 📍 Remote

- Advanced from Intermediate to Senior Software Developer, demonstrating growth and leadership
- Created solutions in a fast-paced start-up environment, growing to a mid-sized company
- Focused extensively on API development as part of a high-performance agile team, significantly boosting customer adoption and reducing churn through the implementation and maintenance of third-party API integrations for roadmapping software
- Worked on an AI chatbot using Python and integrated APIs for seamless information retrieval across Tempo products, reducing developer reliance by enabling autonomous access for sales and support teams
- Implemented the Feedback and Idea Management solution, enabling users to filter feedback, prioritize features, and effectively promote ideas on roadmaps
- Initiated and led a group supporting women in tech, promoting collaboration and engaging in mentorship of junior developers
- Often took opportunities to collaborate with sales to demo features
- Modernized legacy code to enhance accessibility, user experience, and performance
- Developed full-stack solutions using a wide range of technologies, including JavaScript, TypeScript, Node.js, ReactJS, Apollo + GraphQL, PostgreSQL, and MongoDB, across various projects
- Implemented unit tests with Sinon.js, Mocha, and Chai
- Leveraged git & GitLab for version control for CI/CD
- Tracked usage metrics and assess performance improvements by setting up DataDog Dashboards

Innovation Web and Voice Developer

Sun Life Financial

📅 May 2019 – April 2020 📍 Toronto, ON

- Developed and demoed secure backend features using Alexa Skill Kit and Dialogflow to share up-to-date data on investments and coverage with users of the Sun Life Voice Skill, ensuring data integrity and user privacy
- Mentored new co-op cohort each quarter
- Nominated for 2019 CEO's Award of Excellence

EDUCATION

Masters of Computer Science

Georgia Institute of Technology

📅 Present 📍 Atlanta, GA - Remote

- Pursuing OMSCS program part-time

Computer Science B.Sc Honours

Carleton University

📅 April 2019 📍 Ottawa, ON

- PMC volunteer note taker for students with unique needs
- Received outstanding TA nomination

SKILLS

JavaScript

React

Node.js

Python

Django

PostgreSQL

MongoDB

REST APIs

Agile Development

CERTIFICATIONS

Cloud Practitioner CLF-C02

AWS

📅 In-Progress 📍 Self-Study

Machine Learning Specialization

DeepLearning.AI & Stanford Online

📅 In-Progress 📍 Coursera

- Applied ML techniques using Python and scikit-learn/TensorFlow; built regression, classification, and clustering models

Mathematics for Machine Learning and Data Science

DeepLearning.AI

📅 Dec 2024 📍 Coursera

Exploratory Data Analysis For Machine Learning

IBM Skills Network

📅 Jan 2023 📍 Coursera

MongoDB Performance (M201)

Analysis and optimization techniques

📅 June 2022 📍 MongoDB University
